

Fluid filled Outdoor Terminations

Base plate adapter sets TE/FR

For outdoor terminations up to 245 kV

Product main features

- Complete set ready for assembly
- For TE and FR terminations up to 245 kV
- Easy adaptation of support distances
- Recommended for high positioned installation sites
- Made of lightweight Aluminium

The base plate adapter sets are designed to provide a comfortable and safe fixing of outdoor terminations type TE and FR up to 245 kV previously assembled on the ground. Thanks to the rotational concept an easier and faster alignment of the termination during lifting to high positioned installations is granted.

Technical data

Type	Drawing	Part no	Description
320 / 420 mm	S2016	80068	72-170 kV
620 mm	S2017	80067	245 kV
